

9.2 Parabolas  
Honors Algebra 2

Parabola:

Latus Rectum:

Equations of Parabolas		
Form of Equation		$x = a(y - k)^2 + h$
Direction of Opening	$a > 0$ $a < 0$	$a > 0$ $a < 0$
Vertex		
Axis of Symmetry		
Focus	$(h, k + \frac{1}{4a})$	$(h + \frac{1}{4a}, k)$
Directrix	$y = k - \frac{1}{4a}$	
Length of Latus Rectum	$ \frac{1}{a} $ units	$ \frac{1}{a} $ units

9.2 Parabolas  
Honors Algebra 2

1. Write  $y = 2x^2 - 12x + 6$  in standard form. Identify the vertex, axis of symmetry, and direction of opening of the parabola.

2. Graph each equation in general form:

- a.  $2x - y^2 = 4y + 10$

9.2 Parabolas  
Honors Algebra 2

b.  $y + 2x^2 + 32 = -16x - 1$

c.  $3x - y^2 = 4x + 25$

9.2 Parabolas  
Honors Algebra 2

3. Write an equation for a parabola with vertex at  $(-2, -3)$  and directrix  $y = 1$ . Then graph the equation.

4. Write an equation for a parabola with vertex at  $(1, 3)$  and focus  $(1, 5)$ . Then graph the equation.

9.2 Parabolas  
Honors Algebra 2

5. Write an equation for a parabola with focus  $(5, 6)$  and directrix  $x = -2$ . Then graph the equation.
