Inequalities in One Triangle

<p>Exterior Angle Inequality</p>	<p>The measure of an exterior angle of a triangle is greater than the measure of either of the corresponding remote interior angles.</p>	 <p><math>m\angle 1 &gt; m\angle A</math> <math>m\angle 1 &gt; m\angle B</math></p>
----------------------------------	--	--

1. Use the Exterior Angle Inequality Theorem to list all of the angles that satisfy the stated condition below:

a. Measures less than  $m\angle 7$

$\angle 4, \angle 2, \angle 1$

$\angle 5$

b. Measures greater than  $m\angle 6$

$\angle 8, \angle 3$

2. Use the Exterior Angle Inequality Theorem to list all of the angles that satisfy the stated condition below:

a. Measures less than  $m\angle 1$

$\angle 3, \angle 4, \angle 5, \angle 6$

b. Measures greater than  $m\angle 8$

$\angle 2$

Inequalities in One Triangle

Angle-Side Inequalities:

	<p>If one side of a triangle is longer than another side, then the angle opposite the longer side has a greater measure than the angle opposite the shorter side</p>	<p><math>XY &gt; YZ</math>, so <math>m\angle Z &gt; m\angle X</math>.</p>
	<p>If one angle of a triangle has a greater measure than another angle, then the side opposite the greater angle is longer than the side opposite the lesser angle</p>	<p><math>m\angle J &gt; m\angle K</math>, so <math>KL &gt; JL</math>.</p>

3. List the angles of  $\triangle PQR$  in order from smallest to largest.

$\angle Q, \angle R, \angle P$

4. List the angles and sides of  $\triangle ABC$  in order from smallest to largest

$\angle B, \angle C, \angle A$

Geometry CC  
Inequalities in One Triangle

5. List the sides of  $\triangle FGH$  in order from shortest to longest.

$\overline{FH}$ ,  $\overline{GF}$ ,  $\overline{GH}$

6. List the angles and sides of  $\triangle WXY$  in order from smallest to largest.

$\overline{WY}$ ,  $\overline{YX}$ ,  $\overline{WX}$
